Congratulations to Mike Behler, NCBE President, for his nomination for the Heart of Sonoma County Excellence in Board Leadership Award.

All nominees will be honored at the first Heart of Sonoma County in-person awards celebration and luncheon at the Luther Burbank Center for the Arts. Throughout the luncheon, you will enjoy hearing highlights of our nominees, stories of achievement and community, and the opportunity to network with friends and colleagues.

Thank you to Mike for all his help at the Exchange!

Permit Sonoma seeking public comment on Springs Specific Plan draft environmental report

Permit Sonoma, Sonoma County's planning agency, is seeking public comments on a draft Environmental Impact Report for the Springs Specific Plan through July 19.

The draft Environmental Impact Report evaluates the Springs Specific Plan through the lens of the California Environmental Quality Act and finds that implementation of the project could result in significant and unavoidable impacts related to cultural resources, transportation, and wildfire.

The report also identifies mitigation measures and alternatives like processes to protect cultural and tribal resources, enhancing pedestrian safety on Highway 12, and placing utilities underground that would avoid or reduce the impacts of the project.

The draft Springs Specific Plan is designed to foster a vibrant, multimodal community with increased opportunities for housing and improvements for pedestrians, bicyclists and transit.

The area for the Springs Specific Plan is along the Highway 12 corridor between Verano Avenue and Agua Caliente Road in Sonoma Valley. The area is approximately 180 acres, contains around 480 lots and is home to approximately 1,800 people. When fully implemented, the plan could lead to an additional 706 dwelling units, 120 hotel rooms and up to 276,903 square feet of commercial, office, hotel, recreation and non-residential uses. The draft plan proposes design guidelines, development standards, and updated zoning designations to implement the plan.

The plan incorporates feedback from more than 20 community workshops, public surveys and stakeholder meetings held from 2016 to 2019. This planning process developed eight plan objectives:

- 1) Recognize and promote the springs commercial corridor as a mixed-use "downtown" serving the larger Springs community
- 2) Develop a centrally located community plaza
- 3) Celebrate the unique, multi-cultural identity of the

Springs

- 4) Increase affordable, workforce and mixed-use housing
- 5) Improve the pedestrian, bicycle and transit network
- 6) Ensure an adequate parking supply
- 7) Address community safety
- 8) Create and connect to more parks and open space

The Draft Environmental Impact Report is available for an extended public review period of 60 days, commencing May 18 and ending July 19, 2022.

The Sonoma County Planning Commission will hold a virtual public hearing on Thursday, June 16 at 1 PM for the Planning Commission and Permit Sonoma staff to receive comments on the adequacy and accuracy of the draft Environmental Impact Report. The Planning Commission will not respond to any of the comments or take action on the project at this hearing. Certification of the final Environmental Impact Report will be considered at a later hearing which will be noticed in advance.

In addition to the hearing, written comments can be submitted a variety of ways before 5 PM on July 19, including by email at springspecificplan@sonoma-county.org, by fax at (707) 565-1103 and by mail to Doug Bush, Permit Sonoma, 2550 Ventura Avenue, Santa Rosa, California 95403.

For more information visit the Springs Specific Plan project page.

Contractors State License Board Promotes Opportunities for Licensed Contractors in Earthquake Brace + Bolt Program

Kate Tomone Lead Editor, Construction Dive

The Contractors State License Board (CSLB) wants licensed contractors to be aware of new opportunities from the Earthquake Brace + Bolt (EBB) program. The program was created by the California Earthquake Authority (CEA) and the Governor's Office of Emergency Services (Cal OES). The EBB is looking for CSLB-licensed "A" General Engineering and "B" General Building contractors to help retrofit more than a million homes across California.

Contractors with an "A" or "B" license can complete free FEMA online retrofit training to be eligible for the EBB program. FEMA recently awarded \$80 million to fund an additional 21,000 EBB retrofits.

"The Earthquake Brace + Bolt Program helps licensed contractors expand their business while also preparing California property owners for the next earthquake," says Registrar David Fogt.

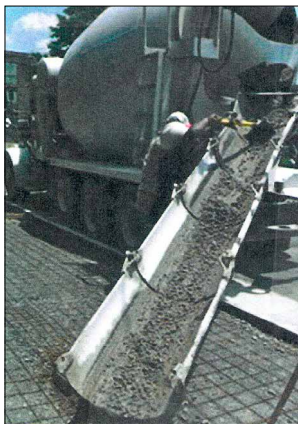

Contractors who want to join EBB must:

- Have a current and active "A" General Engineering or "B" General Building contracting license in good standing.
- Create an online account and complete registration as a contractor.

Contractors State License Board Promotes Opportunities for Licensed Contractors in Earthquake Brace + Bolt Program

FROM PAGE 6

- Complete the required free FEMA online retrofit training.

After completing the two-hour training, licensed contractors are added to the EBB Contractor Directory. Homeowners participating in EBB must hire licensed contractors from the Directory unless they are going to do the work themselves. The contractor's listing on the Directory is free and their business is searchable by homeowners looking for a contractor to do EBB retrofit work.

EBB also provides free marketing materials to licensed contractors on the Directory to help them grow their business, including yard signs, EBB brochures, and an "EBB FEMA-Trained" logo to use online.

EBB involves residential seismic retrofits that bolt the house to its foundation and add bracing, if required, around the perimeter of the crawl space making it more resistant to earthquake activity. For more information on the EBB program and how to register, contact EBB.

California Emphasizes Employees Must Be Free To Leave During Meal Periods

Under California law, employers generally must provide employees working more than five hours in a day with a meal period. These meal periods must be at least 30 minutes, duty-free, and uninterrupted. In addition, for a long time, California courts and the Labor Commissioner have recognized that employees should be free to leave the employer's premises during a meal period. In a recent case, however, the employer tried to argue against such a rule. The California Court of Appeal's decision in *Estrada v. Royalty Carpet Mills, Inc.* should put any doubt on this subject to rest, with employers liable for premium pay under Labor Code section 226.7(c) for not allowing employees to leave during meal periods.

California's History of On-Site Meal Periods

The Labor Code and Industrial Welfare Commission wage orders do not have any express requirement that employees be free to leave the employer's premises during a meal period. Instead, the courts and Labor Commissioner have read California's meal period provisions to include such a requirement.

The California Supreme Court's decision in *Brinker Restaurant Corp. v. Superior Court*, 53 Cal.4th 1004 (2012), is best known for holding that the requirement that employers provide meal periods means that an employee must make them available as required – not that employers ensure that an employee, in fact, takes a meal period once the employer provides the opportunity. *Brinker* also addressed particular requirements for a bona fide meal period. Among them, the Supreme Court recognized that an employer provides an off-duty meal period as required when the employee “is free to leave the premises.” It held that employers “must afford employees uninterrupted half-hour periods in which they are relieved of any duty or employer control and are free to come and go as they please.”

For decades, long before *Brinker*, the Labor Commissioner has taken the enforcement position that employees must be free to leave the premises during meal breaks.

The reasoning stems from the definition of “hours worked” in the Industrial Welfare Commission (IWC) wage orders. They generally define the term as either time in which an employee is “suffered or permitted to work” or “subject to the control of an employer.” Such time must be paid.

The Labor Commissioner has reasoned that an employee who cannot leave the premises during a meal period remains “subject to the control” of an employer during that time and thus must be paid for that time as “hours worked.” The courts approved that interpretation. Further, in *Brinker*, the California Supreme Court agreed with the Labor Commissioner's interpretation that the meal period requirement in the wage orders is satisfied if an employee:

- Has at least 30 minutes uninterrupted.
- “Is free to leave the premises.”
- Is relieved of all duty for the entire period.

Importantly, IWC Wage Order Nos. 4 and 5 contain an exception for employees in the “health care industry,” as those wage orders define it. The definition of “hours worked” for those employees is only the federal Fair Labor Standards Act definition of suffered or permitted to work but does not involve “California's expanded definition, including ‘control.’”

Thus, employers do not have to pay those employees for time that it requires they spend on-site during meal periods – nor, most likely, does it owe them premium pay, either, for requiring them to stay on premises.

Employer's On-Premises Meal Policy Held Unlawful

In *Estrada*, the employer's policy required employees to remain at its facility during meal periods. The employees were relieved of all duties for 30-minute meal breaks. The employer paid employees their regular wages for this on-premises meal period time.

California Emphasizes Employees Must Be Free To Leave During Meal Periods

Under Labor Code section 226.7(c), the class action lawsuit in Estrada sought one hour of premium pay for each employee for every day that the employer required an on-site meal period.

The employer contended that its policy was lawful as long as it relieved employees of duty and paid wages during their meal periods. The court, however, was “unconvinced.” Relying on Brinker, it determined that employees must be free to leave an employer’s premises during a meal period. The court rejected the employer’s argument that Brinker required only relief from duty during a meal period rather than freedom of movement.

The Estrada court concluded that, because employees were not free to leave the premises, the employer’s “on-premises meal policy was noncompliant, so it was obligated to provide premium pay to these employees.”

No Credit Against Premium Pay Owed

To reduce its premium pay liability, the employer in Estrada argued that it should receive an offset by the amount of wages it paid for on-site meal periods. The court rejected the idea. It held that under Labor Code section 226.7, premium pay is different from wages paid for on-site meal period time. Rather than compensating employees for time worked, meal break premiums were “awarded for the non-economic injuries suffered by [employees] due to deprivation of a compliant meal period.” The court in Estrada further explained: “By requiring premium pay for any violation, no matter how minor, the structure makes clear that employers must provide compliant meal periods whenever such a period is triggered.”

A Word About On-Site Rest Periods

Estrada contained an interesting observation about how

LEDUC & DEXTER INC.

WINERIES

California Emphasizes Employees Must Be Free To Leave During Meal Periods

California law views on-site rest periods. The employer contended that the court should compare on-site meal periods to on-site rest periods. The court disagreed, holding that Brinker “unequivocally” required that employees be free to leave during meal periods. It also recognized “material differences between rest breaks and meal breaks, namely their length.”

Significantly, referring to the California Supreme Court’s decision in Augustus v. ABM Security Services, Inc. (2017) 2 Cal.5th 257, the Estrada court observed that “our Supreme Court has suggested employers can lawfully require employees to remain on the premises” during rest breaks. Augustus involved an employee required to remain on-call while remaining on premises during a rest break, which

the Supreme Court held was a violation. The observation in Estrada further supports a reading of Augustus as not prohibiting an employer from simply requiring employees to remain on premises

during rest breaks – as long as they are also not on call. Several federal decisions have read Augustus that way.

Things to Do Now

The Estrada decision leaves no doubt that California employees must be free to leave the employer’s premises during meal periods, except with narrow exceptions. If they are not, an employer faces liability for wages for that time, as well as premium pay for a meal period violation. Employers should make sure that their policies and practices comply.

BUILDERS INCENTIVE PROGRAM

EARN UP TO \$5,000 A YEAR*

To help support the construction of propane homes in Sonoma County, Blue Star Gas is offering builders and re-modelers up to \$1,000 for each home they build with clean burning, energy efficient propane appliances. Construction professionals are eligible for up to five homes per year, for a total of up to \$5,000!

It’s a win-win for you and your customers, who will enjoy the improved energy efficiency, performance, and comfort of a propane home when compared with all-electric counterpart.

'We're sitting ducks': Road builders report increase in collisions

Motorist accidents in work zones have not shown any signs of slowing down.

Zachary Phillips, Construction Dive

Highway construction workers often do their jobs within inches of speeding vehicles and potential sideswipes. It's dangerous, and the numbers aren't trending in the right direction.

"You don't realize what a rearview mirror at 45, 55, 65 miles an hour can do," said Skip Powe, principal at Nashville, Tennessee-based engineering firm Smith Seckman Reid. "A mirror upside the head at 55, hard hat or not, you're in trouble."

Powe's comments came during a briefing hosted by the Associated General Contractors of America, highlighting its annual report surveying highway construction builders.

More highway construction work will start in the coming months — as the bipartisan Infrastructure Investment and Jobs Act will bring \$110 billion in new funding for roads and bridges — and motorist collisions have not shown any signs of slowing down, literally, as distracted driving and speeding become an increasing concern, especially for workers on the front lines.

Infrastructure funding

The IIJA will benefit construction and the nation's aging

infrastructure.

"We're going to see a lot more of that highway work thanks to that bipartisan infrastructure bill," said AGC Chief Economist Ken Simonson during the briefing. More highway work, however, means more drivers traveling at high speeds through an increased number of work zones.

The AGC report finds highway workers more likely to be struck by a vehicle while working than any other time in the last 17 years. According to the survey, 64% of respondents reported at least one crash on their jobsites in the last year. One third reported five or more crashes in the last 12 months.

Workers sustained injuries in 18% of those incidents, and died in 7%. Nevertheless, workzone collisions prove more fatal to drivers and passengers: 41% reported those in the car sustaining injuries with 15% dying as a result of the collision.

'We're sitting ducks': Road builders report increase in collisions

FROM PAGE 14

Though the IIJA sets aside funds for worker safety improvements, Simonson said the AGC views this issue as a state-by-state problem, and encourages their chapters and members to encourage local legislatures to provide deterrents to make highway work zones safer.

Potential solutions

AGC and its affiliates say they train workers to take more stock of their surroundings, while researching technology like wearables alerting workers to nearby vehicles. But even that won't solve the problem.

"Elected officials need to do more to protect workers and motorists in highway work zones," Simonson said.

Marty McKee, vice president of King Asphalt in Liberty, South Carolina, said he's seen an abundance of recent roadway work, but the government has required his teams work at night on both primary and secondary routes, something he described as "a different animal." Late at night, drivers speed more and take more chances on what they perceive as more open roads, Powe said.

Some work zones use barriers to protect workers, but even when those work, it can inflate the project cost. Some

projects don't even have those barriers.

"Most of the time we're just using cones out there, so we're sitting ducks," McKee said.

Drivers have also driven faster as more return to the major roadways, experts said during the briefing. During the earlier days of COVID-19, fewer drivers filled the roads, leading to average speeds increasing. Now, more drivers commute every day, and they don't want to slow down.

Just above half of drivers who increased driving during the pandemic reported driving 10 mph or more above the speed limit on residential streets, AAA reported.

Contractors need to push for a police presence and more automated enforcement, said Steve McGough, president and CEO of construction software provider HCSS. Often, McGough said, a single police vehicle won't deter drivers enough; one officer should watch the site and another should pull over violators speeding past work zones.

Automated enforcement, McGough said, has proven effective, often with increasing fines for those who repeatedly speed through highway jobsites. Nevertheless, all drivers need to practice safer, basic practices.

"Best thing we can do is slow down," McGough said. "The best thing we can do is put our phone down."

Alcohol in the Workplace

What it is, What to Look for, & Policy

INTRODUCTION

Alcohol and alcoholic beverages are commonly consumed by many employees either after working hours or on days off. While an employee’s choice of beverage may or may not affect social and personal relationships and health during these moments outside the work environment, employees who are under the effects of alcohol when at work could expose themselves and others to harm. In this lesson we will cover what alcohol is, how alcohol consumption can affect the workplace, alcohol consumption and heat illness, symptoms of a hangover, zero tolerance policies, and what you should do if you suspect someone to be under the influence of alcohol while in the workplace. Please note that information provided in this lesson is not meant to be used to diagnose an individual. Diagnosing should only be done by a licensed healthcare professional.

WHAT ALCOHOL IS

Alcohol has been categorized as a depressant drug.

Depressant drugs are drugs that can slow down the messages to and from the brain to the body, and the body to the brain. This slowing down of neurological signals can affect things like:

- Problem solving skills
- Judgement
- Concentration
- Reaction times
- Coordination

HOW ALCOHOL CONSUMPTION CAN AFFECT THE WORKPLACE

Whether an employee had been drinking the night before, before work, or they drink during working hours, being under the effects of alcohol while in the workplace can have an effect on the work environment. Effects in the workplace can include:

- Increase in absenteeism
- Employee’s arriving late to work
- Decreases in work productivity or quality
- Division created by co-workers
- An increase of accidents in the work environment

Alcohol in the Workplace

What it is, What to Look for, & Policy

[FROM PAGE 16](#)

- Costs associated with employee turnover

ALCOHOL CONSUMPTION AND HEAT ILLNESS

Whether an employee works indoors or outdoors, drinking alcohol in hot environments could cause employees to experience symptoms associated with heat illness. This is because alcohol increases the risk of the employee experiencing dehydration. This is because alcohol does two things to the body: 1. Alcohol can reduce the release of a hormone called vasopressin that keeps the fluids in the body balanced. 2. Alcohol is a diuretic (i.e., it makes people have to urinate more than they typically would if they were drinking a beverage such as water). For more information on heat illness, please refer to our “Heat Illness” and “Heat Illness Prevention: Hydration” lessons.

ALCOHOL IN THE WORKPLACE SYMPTOMS OF A HANGOVER

When an employee is experiencing a hangover, they may display some of the following symptoms:

- Headache
- Nausea
- Vomiting
- Fatigue
- Sensitivity to light and sound
- Diarrhea
- Trembling

- Lack of appetite
- Feeling anxious

Please note that the symptoms listed in this lesson are not meant to be used to diagnose an Individual as these symptoms can correlate with other medical conditions. Diagnosing should only be done by a licensed healthcare professional.

ZERO TOLERANCE POLICIES

Depending on the company, the work involved, and your state, your company may have a zero tolerance policy for alcohol or other substances in the workplace. These types of policies will outline potential disciplinary actions that you may face while under the influence in the workplace. If you have questions about zero tolerance policies for your company, please speak with your supervisor or designated HR personnel.

WHAT TO DO IF YOU SUSPECT SOMEONE TO BE UNDER IN THE INFLUENCE OF ALCOHOL WHILE IN THE WORKPLACE

If you suspect that someone is under the influence of alcohol while in the workplace, you should do the following:

- Don’t ignore it.
- Don’t act as an “enabler.”
 - o Enabling behavior may include, but not being limited to:
 - Covering for a coworker
 - Loaning money
 - Counseling the individual

Giving their job responsibilities to others in the workplace

Alcohol in the Workplace

What it is, What to Look for, & Policy

FROM PAGE 17

- Document incidents and record times and dates.
- Report your concerns to your supervisor or designated HR personnel.
 - o Reports should contain factual observations, not speculation. For example: “John Doe’s paperwork has missing elements, which is not normal for him.”

CONCLUSION

To conclude, employees who drink alcohol when off work should drink responsibly. However, when at work, employees should be sober and be in good condition to complete their assigned tasks. Being under the influence while at work could result in strained work relationships, missed work, injuries, or death. If you notice noticeable signs or symptoms, or are struggling with alcohol addiction, please speak with your supervisor about any resources or programs that may be available to you for assistance.

Capitol Connection Q&A for Contractors

By Shauna Krause
Capitol Services, Inc

I can assure you the tail does not wag the dog! Contractors with ‘qualifier’ questions might be barking up the wrong tree without expert help...

Q: Our Qualifying Party just informed us he is resigning as of May 31st. We are contemplating our exposure from here. For projects that have already started, can they continue construction after May 31st? For projects that haven’t started work but have started manufacturing at their plant, can the projects be started on site after May 31st?

A: Your license belongs to the Company, not the Qualifying Party. Therefore, you are still licensed once your Qualifier resigns. From his/her date of resignation, the Company has an automatic 90 days to replace the Qualifier. During those 90 days, the license remains Active and you

can continue business as usual.

Q: We are currently in process of obtaining a new license for one of our Companies. Our Responsible Managing Employee (RME) who signed up with us has informed us he has found another opportunity he is going to pursue, but he has agreed to remain with our Company until we are up and running with a license. We are affiliated with several other licensed companies within California and we are wondering if we can pull one of the Qualifiers from a Sister Company or one of our Subsidiary companies to also be our Qualifying Individual?

A: Business & Professions code 7068.1 allows for an individual to act as the Qualifier for another Active license- if one licensee owns at least 20% of the other. So, your “subsidiary” situation will meet that requirement, but the “sister” company situation does not since one entity doesn’t own the other.

Q: It is time to file our Annual List of Officers with the Secretary of State in Nevada. We are a Limited Liability Company (LLC) with one Member which is a Holding Company. We will be listing three “Officers” of the LLC with the SOS. They are not US citizens, I’m not sure if that even matters, but our question for you is do they need to be added to our Contractor’s License in Nevada as well? Currently, we have the Holding Company and an authorized signer listed.

A: NRS 624.250(g) outlines the requirements regarding who must be listed on a Contractor’s License. For LLC’s, any “Managers or Members with managing authority...” are required to be listed on the license. Similar to the regulation in California, all Members and/or Managers who are shown on record with the Secretary of State also must be on record with the Licensing Boards. And just FYI, the US citizenship does not matter to the SOS.

While knowledge is power, knowing where to go for the answers is half the battle. Get expert assistance immediately when you call 866-443-0657, email info@cutredtape.com, or write us at Capitol Services, Inc., 3609 Bradshaw Rd, Ste H, #343, Sacramento, CA 95827. **Search past columns at www.cutredtape.com.**
