EXCHANGE

NCBE is Now Offering Online Planroom Advertising!

The online plan room provides members with access to construction plans and specifications for projects in the state of California. The Online Plan Service platform is an easy-to-use tool that allows users to access real-time information and construction documents on any platform.

NCBE members now have the opportunity to advertise their business and services in the online Planroom!

Ad Size: Max width 430

Cost:

Primary Locations - \$1000 for 3 months

Secondary Locations - \$800 for 3 months

Primary Locations:

Login Page: Zone 1, 2

Bidding projects: Zone 5

Daily projects, tracked projects: Zone 8

Project details: Zone 9, 10

Secondary Locations:

My profile, saved search, support center, Prebid projects, project activity: Zone 3

Notification, Post bid: Zone 4

Planroom Subscriptions, add to bidders, install software, search spec book: Zone 6, 7

For more information on Planroom advertising, please contact Matt Warner at planroom@ncbeonline.com

NCBE Member Programs:

Group Health Insurance -

Members of the North Coast-Builders Exchange have an opportunity to join our Group Health Insurance Plan. As part of a network of five Builders Exchanges, we are able to offer members and their employees a comprehensive employee benefits program that includes medical, dental, vision, and life coverage.

Group Workers' Comp -

NCBE's workers' comp program is through Compstar/Benchmark and is managed by George Petersen Insurance Agency. NCBE members will get an additional 10% discount (on the insurer's base rates) on their workers' comp through this program.

Group Legal Services -

NCBE's Group Legal Plan enables members to get excellent legal advice at very affordable rates from one of the area's top law firms – Shapiro, Galvin, Shapiro & Moran, headquartered in Santa Rosa.

Online Plan Room -

The Online Plan Service platform is an easy-to-use tool that allows users to access real-time information and construction documents on any platform; PC, Mac, Tablet, or Smart Phone. The OPS platform allows users to view, print, download, and take-off plans and specs.

For more information on our programs, call our office at 707- 542-9502.

OSHA Plans to Expose Your Injury Data

David Sparkman

If allowed to stand by the courts, a rulemaking issued recently by the Occupational Safety and Health Administration (OSHA) will require employers to expose their reported accident illness and report data on the Internet, making it available to union organizers, personal injury lawyers, and their competitors.

Scheduled to largely take effect on Jan. 1, 2024, It applies to employers with 100 or more workers in industries the agency defines as “high hazard,” although the list of these industries that OSHA provides appears to cover very nearly every employer in America today. Employer attorneys advise covered organizations to begin preparing now for next year’s reporting requirements.

Under the rule, these employers must electronically submit information from their Form 300-Log of Work-Related Injuries and Illnesses, and Form 301-Injury and Illness Incident Report to OSHA once a year. Businesses in named high-hazard industries that have 20 or more employees are still required each year to submit electronically their OSHA Form 300A Summary of Work-Related Injuries and Illnesses.

“To improve data quality, establishments are required to include their legal company name when making electronic submissions to OSHA from their injury and illness records,” states the agency’s news release announcing the rule. “OSHA will publish some of the data collected on its website to allow employers, employees, potential employees, employee representatives, current and potential customers, researchers and the general public to use information about a company’s workplace safety and health record to make informed decisions,” it adds. “OSHA believes that providing public access to the data will ultimately reduce occupational injuries and illnesses.”

OSHA’s top administrator Doug Parker explained, “Congress intended for the Occupational Safety and Health Act to include reporting procedures that would provide the agency and the public with an understanding of the safety and health problems workers face, and this rule is a big step in finally realizing that objective.”

Employers emphatically disagreed when a similar rule was finalized in the waning days of the Obama Administration in 2016. It was challenged in court but was later withdrawn by OSHA after Presi-

dent Trump took office and installed new leadership at the Department of Labor (OSHA’s parent federal agency).

“With the new online availability of these records, employees, former employees and their representatives will be able to review your recordkeeping decisions by directly accessing the OSHA website without involving you,” explain attorneys who work for firm of Constangy Brooks Smith & Prophete.

They also note that this new process will make it much easier for OSHA to more quickly and efficiently focus in on and select certain employers and industry segments to become targets for special emphasis enforcement programs, like the one recently announced for the warehousing industry.

Cost Issues Are Raised

Another complaint raised in the legal challenges that were brought against the agency that could be resurrected this time around is the enormous cost to employers of adhering to the new rules, a subject remarked on by legal analysts as well.

OSHA Plans to Expose Your Injury Data

From Page 4

“The cost and resources necessary to implement electronic data collection and maintenance will be significant. OSHA’s financial estimates may not account for the time and effort required to bring an employer into compliance, especially ones without any electronic collection procedures currently in place,” observe attorneys for the law firm of Morgan, Lewis & Bockius.

They say that the OSHA recordkeeping process has always allowed employers the continuing opportunity to revise injury and illness records with new changes as time goes by, “but once the injury and illness data are initially reported and disclosed, it may be difficult for employers to revise this public information. The records can also reveal proprietary information, such as the number of workers at a facility, and their publication may create a chilling effect because the data may be misinterpreted or misrepresented by the media or competitors.”

In the final rule, OSHA argues that there is little or no expectation of privacy in records that are required by law to be kept and made readily available. “Although OSHA states that it will use software to remove private employee information from the disclosures before posting, the effectiveness of this software remains to be seen,” point out attorneys J. Micah Dickie and Sharon Suh of the Fisher Phillips law firm.

In addition, the expansion of the regulation to cover establishments with 100 or more employees could be used to identify injuries and illnesses for individual workers at certain facilities, and thereby reveal the specific workers’ medical information, violating their privacy, the Morgan, Lewis & Bockius attorneys warn. They say that this same information also could easily be exploited by competitors.

One thing the attorneys who have looked at the rule seem to agree on is that employers need to start preparing now, long before the rule goes into effect on New Year’s Day 2024. That includes making sure that all of your recordkeeping is kept up to date. As a result, you need to be sure to evaluate each incident of injury or illness to ensure that the OSHA standards actually require you to record this kind of information and make an effort to avoid recording any extraneous details, Dickie and Suh advise.

The new rule does not change the current requirement for establishments with 250 or more em-

ployees that are not in a designated industry to electronically submit information from their Form 300A to OSHA annually, they point out. This means large employers in what are considered to be non-hazardous industries will still have to submit such data which will then be made public (unless you fall under an exemption to the rule).

Also keep in mind that if you do business in a state where a state agency rather than federal OSHA enforces the Occupational Safety and Health Act (such as California, Kentucky and 24 other states), record-keeping requirements may differ.

Finally, employers should review their injury and illness reporting procedures to ensure that such programs are reasonable and do not end up discouraging employees from reporting incidents of injury and illness, warn the Morgan, Lewis & Bockius attorneys.

Readers Respond: OSHA's new recordkeeping rule seen as business as usual

Respondents to a recent Construction Dive survey had mixed feelings about the rule's content.

Earlier this month, OSHA published its new electronic recordkeeping rule, which will require employers with 100 or more employees in certain industries, including construction, to submit information from the agency's Forms 300 and 301 once per year.

In addition, OSHA retained the requirement for employers with 250 or more employees to electronically submit information from Form 300A once per year. Employers with 20 to 249 employees in certain designated industries will continue to be required to electronically submit information from Form 300A once per year.

Associated Builders and Contractors came out in opposition to the new rule, citing privacy concerns. The new rule will post data gathered via the forms on a public website, though the agency says identifying information like employee names and contact information will be removed.

While ABC is opposed, Construction Dive readers were not especially worried about the new rule. Respondents to an online survey last week were split on whether or not they have addressed it with their teams, but said that the ruling wasn't an urgent issue.

Some readers said that the new rule was fine,

or inconsequential.

"We have to submit every year already, so I don't understand why other companies are upset about having to do it," said one reader, Toby Stowe of Kansas City.

"Anything to keep people safer and more accountable," said Carrie from Wichita, Kansas.

John Tuisl, vice president of risk management at Chicago-based builder McHugh Construction, was frank about the effect, or rather, the lack of effect, the rule would have on his company's business.

"The rule does not really change any reporting requirements for McHugh Construction. There may be some more required information, but the overall impact is negligible," Tuisl said. The company employs between 51-100 people, per the survey.

Some readers, however, were concerned about the new rule as an example of OSHA's regulatory power.

"Accountability is an effective tool in regard to certain aspects; is OSHA overreaching?" said Cynthia McGraw of Virginia.

The new rule goes into effect on Jan. 1, 2024.

Construction starts continue volatile ride, 'up one month and down the next'

Construction Dive

Choppy conditions will persist due to high interest rates and tightening lending standards, said Richard Branch, chief economist for Dodge Construction Network.

Published July 24, 2023

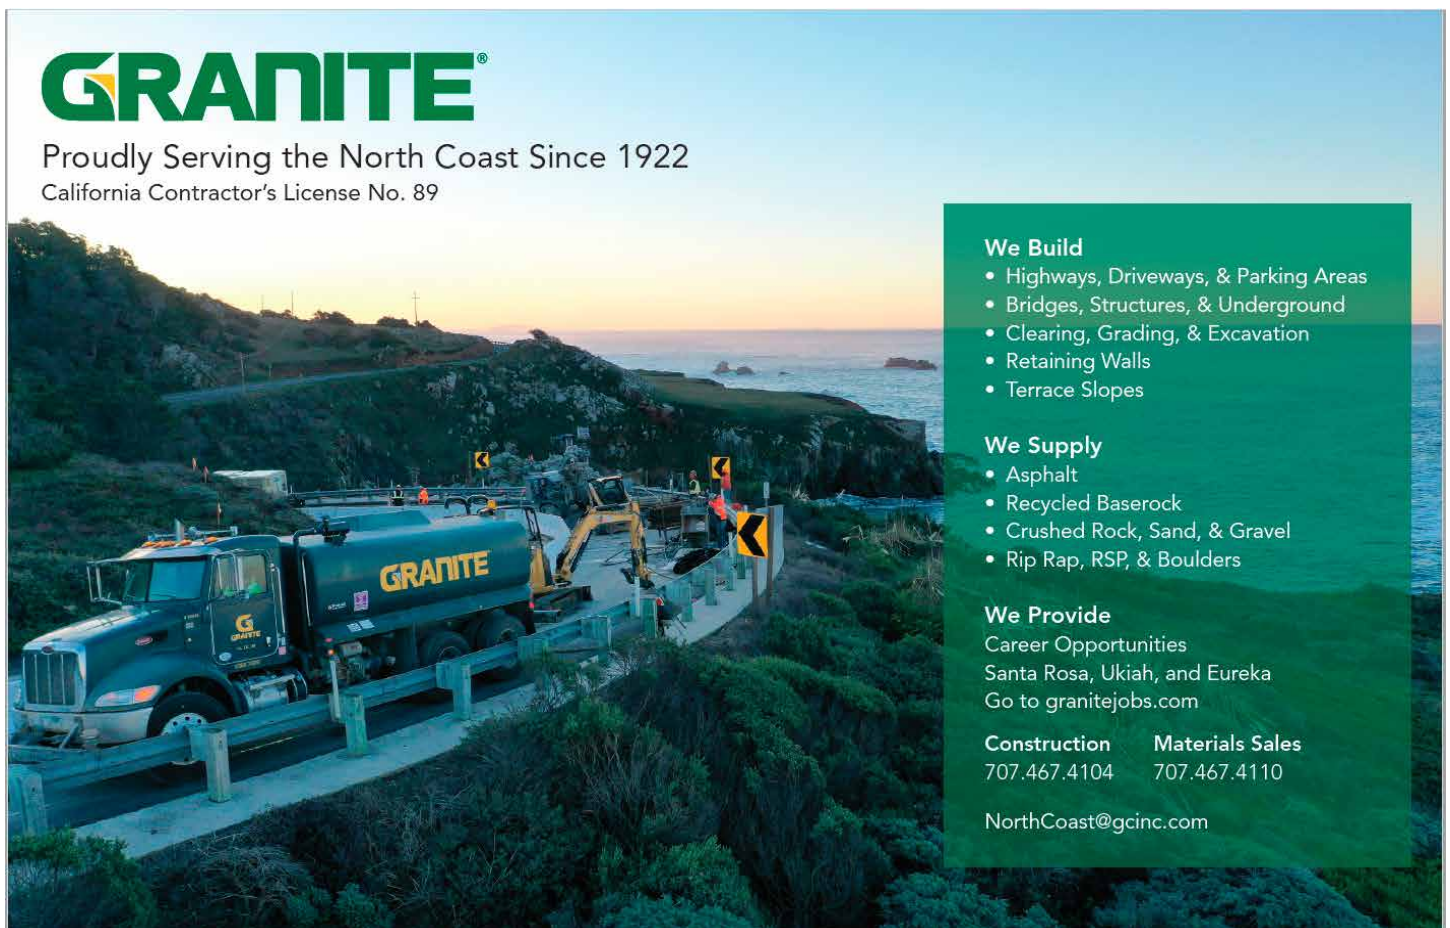

Dive Brief:

- Volatility in construction kickoffs persisted in June as new manufacturing groundbreakings fell off a cliff, driving total starts down 9% to a seasonally adjusted annual rate of \$1 trillion, according to Dodge Construction Network. That followed a rise of 8% in May.
- A lack of mega-projects is the main cause for this fluctuation of construction starts recently, said Richard Branch, chief economist for Dodge Construction Network.
- “High interest rates and tightening lending standards are leading to uncertainty among owners and developers, also creating hesitation among stakeholders, leading them to carefully assess whether projects will break ground,” said Branch. “These conditions will persist through the remainder of the year, meaning little forward motion in construction starts.”

Dive Insight:

A lack of mega-projects in the manufacturing sector, which previously had seemed bullet proof amid an onshoring blitz, translated into a 67% nosedive in starts for that project type following aggressive growth in May. Nonresidential building starts tumbled 14% in June to a seasonally adjusted annual rate of \$348 billion. Commercial starts dropped 6% in June with gains in the beleaguered office and hotel sectors, offset by a pullback in warehousing projects, according to the report.

Construction starts continue volatile ride, 'up one month and down the next'

Construction Dive

Institutional projects provided a slight silver lining, buoyed by healthcare and airport terminal work to post a 15% gain in June.

Despite the whipsawed monthly results, total nonresidential building starts remain healthy for the year, posting a 25% jump from June 2022. During that same span, starts in manufacturing and commercial remain up 76% and 9%, respectively.

The largest nonresidential building projects to break ground in June include:

- The \$2.6 billion JetBlue Terminal 6 at JFK airport in Jamaica, New York.
- The \$625 million first phase of the GlobiTech semiconductor plant in Sherman, Texas.
- The \$558 million hospital tower at Strong Memorial Hospital in Rochester, New York.

Residential construction activity stumbles

Construction starts in the residential sector continue to post slow results, down 24% in 2023, according to the report.

Residential building starts fell 4% in June to a seasonally adjusted annual rate of \$344 billion. For the 12 months ending in June 2023, residential starts dropped 17%, including a 26% drop in single family starts. On the other hand, multifamily starts ticked up 2% on that rolling 12-month basis.

The largest multifamily structures to break ground in June included:

- The \$500 million 1072 W Peachtree building in Atlanta, Georgia.
- The \$450 million Pendry-One Ashley condo tower in Tampa, Florida.
- The \$345 million Merchant Building in Columbus, Ohio.

Volatility in nonbuilding starts

After posting gains in May, nonbuilding construction starts tumbled 9% in June to a seasonally adjusted annual rate of \$317 billion.

That's due to a 43% cratering in utility and gas plants and a 22% drop in highway and bridge starts, according to the report. Conversely, environmental public works inched up 1% in June.

Still, year-to-date through June, nonbuilding starts gained 29%, bolstered by a 61% jump in utility

and gas plants, 19% gain in highway and bridges, and 14% increase in environmental public works starts, according to the report.

The largest nonbuilding projects to break ground in June included:

- The \$2.6 billion Matterhorn Express Pipeline in Texas.
- The \$1.4 billion Buffalo Bills stadium in Orchard Park, New York.
- The \$930 million Bissell & Lemay wastewater treatment plant in St. Louis, Missouri.

Is DE&I Facing Realignment?

Adrienne Selko

An unwavering characteristic of corporate strategy is to create initiatives to solve challenges. Often these initiatives slide seamlessly into the core culture finding a permanent home. But just as often these initiatives fade away after a couple of years. Reasons for these disappearing directives vary; the issue has been solved, budgets are cut due to economic conditions and often they just don't stick.

Diversity, Equity and Inclusion (DE&I), which began as an initiative, is facing a critical juncture. At many companies, it has moved so firmly into the company's operations that it is considered a competitive advantage. Many companies have proclaimed, and there are studies to back them up, that having a diverse population has made them more profitable. A diverse workforce taps into different belief systems offering more input into problem-solving. Having a workforce that reflects the diversity of customers is advantageous on many levels. And employees, especially younger ones, find value in working for a company that embraces diversity.

These advantages have been recognized for a while and most companies have DE&I officers. However, these jobs and the concept of DE&I has come under scrutiny due to social unrest and politics.

A recent survey from Revelio Labs found that attrition rates for DE&I roles have outpaced those of other roles since late 2020. This is reflected in the loss of DE&I professionals at high-profile companies such as Amazon, Twitter, Wells Fargo, American Airlines, Honeywell, Walmart and Capital One. And overall organizations are cutting back on DE&I teams, as 20% of the respondents to the survey reported, with 12% believing that more cuts could occur depending on economic conditions.

EHS Today asked ASSP President Jim Thornton for his take on this issue.

EHS: Let's start with where your organization is on your own DE&I initiative.

JT: Our 14-member DEI Task Force served for one year and greatly helped put diversity, equity and inclusion front and center at an organization that aimed to strengthen itself while advancing worker safety and health in all industries. Meaningful change has been achieved, including ASSP hosting a virtual DEI Summit this past January that involved several hundred workplace safety and health professionals.

Also, we now have a standard operating guideline focused on DEI; consistent learning opportunities offered at education events; Society-level election modifications geared toward inclusion; and a Code of Professional Conduct currently being revised.

EHS: In this past year, there has been some backlash at companies either for supporting certain stands, such as Pride month or for not making meaningful progress in DEI issues. What advice do you give to your members on how to deal with this?

JT: DEI should be an organizational core value because it advances the well-being of all workers while helping to ensure that people's differences are not only accepted but celebrated. Everyone deserves a workplace culture that embraces opportunities to learn and grow so all workers can excel. DEI is at the heart of that objective.

Generally speaking, if workers feel safe and appreciated, they will be happier and more productive, and business will flourish. Leaders should aim to create environments in which workers can comfortably be themselves without biases and repercussions. DEI supports growth and success in today's competitive marketplace.

EHS: Do you feel this issue will fade over time or is it here to stay? If here to stay, as many in the younger generation cite this as an important program for companies to have, how would you advise your members to make sure these programs are sustainable?

JT: DEI is a core value and cultural commitment that should become the norm at every organization. While that's not yet the case today, this critical movement is growing. If you truly value your employees, it's essential to give them an environment in which they can thrive. Everyone deserves fair and equitable treatment, and making it a core organizational value is the best way to achieve that.

Workers say surveillance makes them less productive — if they know about it

ConstructionDive

While employers have sought surveillance to improve remote productivity, various studies and surveys indicate that such monitoring could be counterproductive.

Dive Brief:

- Employees remain suspicious of employer monitoring — if they know it exists, at all. Just over 40% of U.S. professionals surveyed by Glassdoor said their employer monitoring their work devices makes them feel less productive, according to data released July 25.
- However, 36% said they don't know if they're being monitored in the first place.
- Certain industries vary in how they feel about such surveillance. Finance and technology professionals were most likely to say it harms productivity, while accounting professionals were least likely to say it negatively impacts their work.

Dive Insight:

In the wake of the pandemic as remote work became commonplace, some employers turned to remote monitoring tools to assuage concerns about employee productivity. But various studies and surveys indicate that such monitoring could be counterproductive.

Five survey results released earlier this year, for example, showed that one-third of managers surveyed said monitoring had no impact on productivity, while one-quarter said it drove workers to find new jobs. A fifth said that it led employees to actively sabotage their organizations.

Five also highlighted a disconnection between what managers thought of the technology and how employees felt about it. More than two-thirds of managers said they thought productivity tracking software improved performance, while 72% of employees said the software either diminished or had no impact on performance.

Other studies have seen similar results; more than 80% of IT managers told digital workplace vendor IE that they had seen negative results after their organizations adopted such tools.

Notably, advocates have pushed the Occupation-

al Safety and Health Administration to create a workplace standard for electronic surveillance as part of the agency's mission of maintaining worker safety against hazards to physical and mental health. The White House, too, said earlier this year it plans to examine the effect of such tools on workers.

Capitol Connection Q&A for Contractors

By Shauna Krause
[Capitol Services, Inc](#)

I will get ‘artsy’ before this installation of questions and answers concludes! First, let’s give extended life to a ‘zombie’ license, before pumping the brakes on a purchase agreement. Another inquiry illustrates how contractor license law is sometimes murkier than clear, despite having the rules in writing...

Q: Am I able to add a classification to an Inactive license? I’m thinking that if I am required to pay to activate it in order to add a classification, I’ll just hold off until I’m ready to use the license.

A: Yes, you can add a classification to an Inactive license, no need to pay to activate it first!

Q: I am considering buying an existing contracting business, however I’m not a Contractor. My expertise is in Business, I have an MBA. My Business Broker informed me my degree would be beneficial when putting the license in my name. He also suggested that I contact you regarding additional experience or requirements to make sure I can continue business as is once the purchase is finalized. Do you have any advice for me?

A: You will need to have a Qualifying Individual on the license. Sometimes buyers make it part of the deal for the seller to remain on the license for a certain amount of time until they gain the necessary experience.

Another option is hiring someone with the relevant experience OR using one of the employees who has worked for the business for an appropriate period of time to Qualify the license. The experience requirement is a total of four years of full-time experience in the classification on the license. The CSLB will give you up to three years of credit for

education depending on your course of study.

Q: One of your previous Q&A’s makes reference to a Qualifying Party qualifying two company licenses at the same time if “the majority of the personnel are the same”. What does that mean exactly? The employees/staff need to be employed by both companies? I’m a bit confused by how that would be possible or make sense.

A: I understand your confusion! By “personnel”, the CSLB is referring to the Officers/Members/Managers of the entity. More specifically, the individuals (or entities) listed with the CA Secretary of State and in turn, listed on the contractor’s license under “Personnel”. We are not referring to staff/employees.

Contractor License Requirements for Creation and Installation of Artistic Works:

The Contractors State License Board (CSLB) is issuing a reminder about contractor license requirements as they relate to the installation or creation of artistic works in public or private places.

Some examples might include painting of murals along roadways or on indoor or outdoor walls; bolting, cementing, or welding of metal or iron artistic structures to the ground or to other permanent structures; or installing other durable artwork to indoor or outdoor permanent structures or land.

Whether the ultimate purpose of the work is functional or artistic, such services will require a contractor’s license if the activity meets the definition of “contractor” in Business and Professions Code section 7026.

While knowledge is power, knowing where to go for the answers is half the battle. Get expert assistance immediately when you call 866-443-0657, email info@cutredtape.com, or write us at Capitol Services, Inc., 3609 Bradshaw Rd, Ste H, #343, Sacramento, CA 95827. Search past columns at www.cutredtape.com.
